

## **EVERTS AIR CARGO – Airline Maintenance Training Manager (Fairbanks)**

Due to our continued growth and expansion, we have a position open in Fairbanks for a full-time Maintenance Training Manager.

- Housing may be provided during training.
- Full benefits including Medical/Vision/Dental/401k with company match are available.
- Position open in Fairbanks.

Everts Air Cargo was formed in 1995 as a Part 121 Certificated Cargo Airline. Everts Air Cargo's headquarters are in Fairbanks Alaska. Fairbanks serves as our primary base for the maintenance department for both scheduled and unscheduled maintenance to include A checks, B checks and C checks. Line maintenance functions are also conducted in Anchorage Alaska, and Laredo Texas. Our current fleet consists of the MD-80, DC-9, DC-6, and the C-46.

### **Job Function:**

Develop, maintain, and teach Everts Air Fleet type technical programs. Position seeks candidate with strong communication skills, planning and organizing skills as well as computer presentation skills. Must have previous experience teaching in a classroom setting. Desired skills include knowledge of PowerPoint and Excel. Preferred skills include Zoom conferencing and video editing. Flexibility is necessary as the work schedule is dictated by the training needs of the Everts Air Fleet. Candidate must possess a current FAA Airframe and Powerplant license and previous line maintenance experience on heavy jets. Emphasis will be on the DC-9/MD-80 curriculum to include FAM as well as system specific training. Develop and deliver focused training for areas identified through SMS, CASS, or ASAP. Evaluate new equipment, software, courseware, or other technologies to enhance the quality and retention of the training material.

The successful candidate will have demonstrated ability in the following areas:

- Creating and/or facilitating a curriculum to drive strategic training as well as employee skill development.
- Selecting and managing resources, including working with both internal employees and external vendors, to develop and deliver training.
- Evaluating performance to ensure training is meeting business needs and improving employee performance.
- Critical thinking, time, and organizational management
- Verifiable track record in developing and executing successful training programs.
- Driving company values and philosophy through training and development activities
- Able to explain and troubleshoot complex systems.
- Experienced on the MD-80 and JT8D-200 series engines.

### **License(s):**

1. Airframe and Powerplant Certificate
2. Valid driver's license

### **Qualifications:**

1. Requires ability to understand and retain verbal and written information.
2. Requires strong background in the use and development of training aids and programs.
3. Requires occasional lifting of weights of 70 pounds or more.
4. Requires ability to stand on hard surfaces, floors, ladders, and work stands for extended periods of time.
